

DTRA Postdoctoral Scholars Program

Hosted by the
Hopkins Extreme Materials Institute

Opportunity

The Hopkins Extreme Materials Institute is recruiting candidates for the Defense Threat Reduction Agency (DTRA) Postdoctoral Scholars Program. This program trains recent PhD graduates in areas of program management relevant to DTRA-funded national security research.

As a DTRA Postdoctoral Scholar you will work directly with DTRA program managers in support of the DTRA mission to counter the threats posed by weapons of mass destruction. In addition to technical training, you will gain experience with program management of federally-funded research.

Benefits

- Support critical national security research
- Receive technical, program management, and federal acquisition training
- Competitive compensation
- Annual travel allowance and health insurance
- Variable terms of 1-3 years

Eligibility Requirements

- U.S. citizenship and ability to obtain a security clearance
- Willingness to relocate to DTRA Headquarters (Fort Belvoir, VA)
- Have received, or expect to complete all requirements for, a doctoral degree in a relevant field by the start date of the appointment.
